### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Thomas Malone on 11-18-2004.

The application has been amended as follows:

1.(Currently Amended) A method of oxidizing a phosphite ester linkage in a nucleic acid array to a phosphate linkage, comprising contacting said phosphite ester linkage with a solution of from ~~about~~ 0.005 M to ~~about~~ 0.05 M iodine in a mixture of water and aprotic organic solvent to form said phosphate linkage.

The following amendment set forth in the Examiner's amendment of 7-13-04 was cancelled:

In claims 1-3, the phrase "about 0.005 M to about 0.05 M iodine" was replaced with the phrase "0.005 M to 0.05M."

The correct amendment was:

In claims 2-3, the phrase "about 0.005 M to about 0.05 M iodine" was replaced with the phrase "0.005 M to 0.05M iodine."

2. The following is an examiner's statement of reasons for allowance:

The amendment to identify the organic solvent used in the claimed method as an "aprotic" solvent has been done to preclude the need to further prosecute the instant claims under 35 USC § 103(a) as being obvious for the reasons of record. The Rule 1.132 Declaration submitted by Applicants on 3-14-2003 was not considered commensurate in scope for the broad class of organic solvents originally encompassed by the claimed invention. The unexpected results set forth in the Declaration, were obtained using the preferred class of organic solvents according to the present invention, specifically "aprotic" solvents (see page 20, lines 3-10). The claimed method without such an amendment would remain rejected under 35 USC 103(a) for the reasons of record since the unexpected results set forth in the 3-14-2003 Declaration were not commensurate in scope with the claimed method which encompassed the use of any class of organic solvent.

The second amendment set forth above was considered necessary to correct a typographical error in the examiner's amendment mailed 7-13-2004.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Janet L. Epps-Ford, Ph.D. whose telephone number is 571-272-0757. The examiner can normally be reached on Monday-Saturday, Flex Schedule.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John L. LeGuyader can be reached on 571-272-0760. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
